Implementing Consent Management

T3CON 2023 Lightning Talk 2023-10-13

Mario Lubenka, B.Sc. Senior Web Developer

mario.lubenka@dkd.de

What we're working with

Enterprise Websites

Enterprise Data Management (PIM/MDM)

GDPR (General Data Protection Regulation)

- Introduced in May 2016 (in effect since May 2018)
- <u>Article 13</u>: websites need to inform their users about how their personal data is used and allow them to control it
- it's not only about cookies!
 - German Federal Court (2017): IP addresses are personal data (<u>Az. VI ZR 135/13</u>)

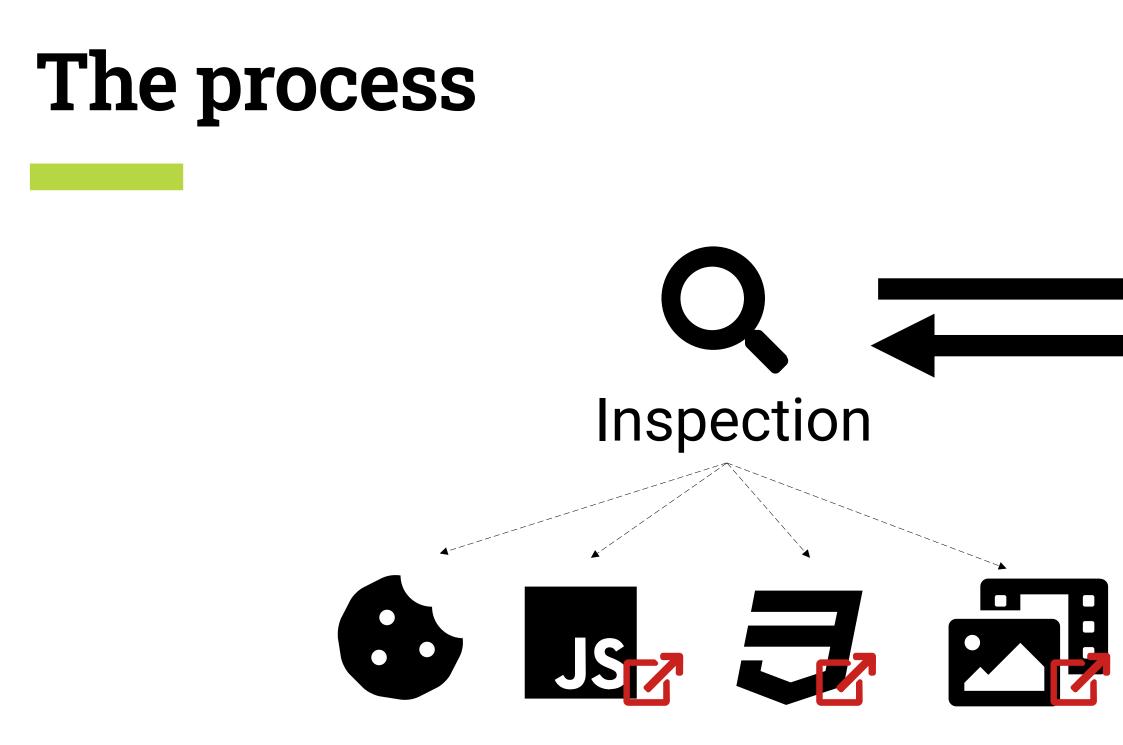

=> external resources!

Inspection:

Get an overview of the resources and cookies used on the website

• Adaption:

Ensure that no external resources and cookies are set without consent

GDPR Website Audit Q

- Scan the website
- Find potentially privacy-critical resources and elements
 - i.e. cookies, external scripts, external images
- PDF report for investigation by client's data privacy officer
- supportive information, not legal advice

Was ist eine Ressource?

Eine Ressource kann ein Dokument, Stylesheet, Bild, Script, AJAX- bzw. XHR-Request sein, welches in die Website eingebunden wird. Klassische Beispiele: Google Maps, YouTube-Videos, Google Analytics, Tweets, Instagram Stories, etc...

Ressourcen

Schreibt die Website ein Cookie?

Ein Cookie ist ein kleiner Datensatz auf dem Computer des Benutzers welcher von Websites geschrieben werden kann. Zum Beispiel Datum und Uhrzeit des letzten Besuches oder eine eindeutige Nutzerkennung.

Cookies

Es wurden von folgenden Domains Ressourcen eingebunden:

- 1. www.google-analytics.com
- 2. stats.g.doubleclick.net
- 3. rawgit.com
- 4. maps.google.com
- 5. maps.gstatic.com
- 6. maps.googleapis.com
- fonts.googleapis.com
- 8. fonts.gstatic.com
- 9. www.gravatar.com
- 10. videopress.com
- 11. v0.wordpress.com

- Es wurden von folgenden Domains Cookies gesetzt:
- 1. .videopress.com
- 2. www.typo3-solr.com
- 3. .vimeo.com
- 4. player.vimeo.com
- 5. .google.com
- 6. www.t3quick.de
- 7. .youtube.com
- 8. .doubleclick.net
- 9. .facebook.com
- 10. www.facebook.com

Prüfungsergebnis für www.typo3-solr.com

Was ist eine Ressource?

Consent Management

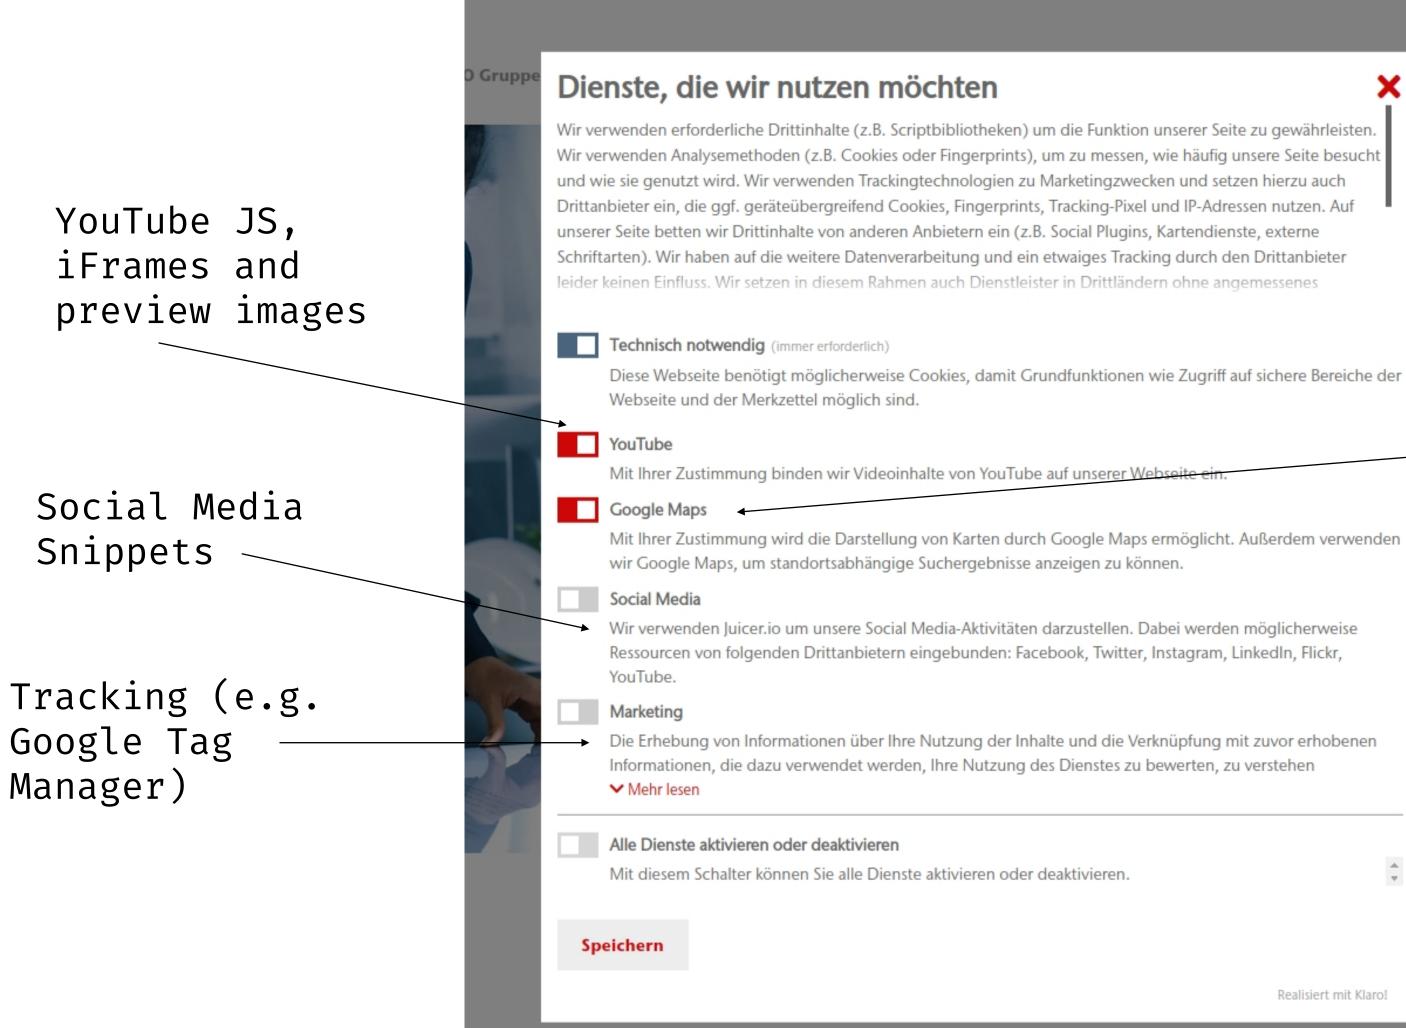

- Consent for cookies and external resources
- many providers out there (e.g. Cookiebot, CookiePro, Klaro)
- External resources can be connected to a category and are only loaded, when the user gives their consent for the category
 - JavaScripts, StyleSheets, Images, iFrames
- Ext:dkd_gdpr
 - TYPO3 CMS 7.6 to 12.4 LTS
 - Provide Klaro Consent Management in Frontend
 - Seamless integration into TYPO3 asset management, allowing easy configuration via TypoScript or PHP

Method Development for Hypervelocity Impact: The Discrete Element Method (DEM)

In a recent feature publication in the Journal *Materials* we have applied for the first time the Discrete Element Method for the simulation of hypervelocity impact phenomena, i.e. for velocities well beyond 5 km/s. In this project with the German Aeronautics and Space Research Center (DLR), we develop a realistic physical model for describing hypervelocity impact fragmentation of satellite structures.

This is of utter importance as the space debris of former space missions in the lower earth orbit (LEO) poses a real threat to satellites in operation today. Based on realistic physical modeling of material behavior upon impact, our long-term goal is the prediction of the likelihood of debris collisions with satellites in LEO.

Provider List

- Client requirement: Display the list of providers used on the website
- should be always up-to-date
- over 100 websites in different countries
- - e.g. country-specific Marketing software, live chat
 - not controllable by the development team

Additional external JavaScripts can be added via Google Tag Manager at any time

Provider List

- Website is scanned with full consent granted
- Scanned and updated every day
- Report processed by TYPO3 and displayed on a separate page
- Direct access to privacy settings

Google Tag Manager

We use 4 resources of this provider. You can configure this service using the privacy setting "Marketing".

Google Analytics

We use 9 resources of this provider and set the following 4 provider cookies:

- _gid
- _gat_UA-69122562-1
- ∎ _ga
- _ga_EJ25E51EZ3

Google Maps

You can configure this service using the privacy setting "Marketing".

We use 2 resources of this provider. You can configure this service using the privacy setting "Google Maps".

We use 3 resources of this provider and set the following 4 provider cookies:

_hjFirstSeen

Hotjar

- _hjSessionUser_778639
- _hjAbsoluteSessionInProgress
- _hjSession_778639

You can configure this service using the privacy setting "Marketing".

YouTube

We use 34 resources of this provider and set the following 3 provider cookies:

- YSC
- VISITOR_INFO1_LIVE
- CONSENT

You can configure this service using the privacy setting "YouTube".

Juicer.io

We use **19 resources** of this provider. You can configure this service using the privacy setting "Social Media".

Key Takeaways

- GDPR: Consent management is needed for cookies and external resources

- GDPR Audits help to identify potentially-critical resources and cookies on your website Consent management requires continuous inspection and adaption Be wary of external resources loaded via Google Tag Manager
